## DETAILED ACTION

### *Election/Restrictions*

1. Claims 19-20 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Applicant timely traversed the restriction (election) requirement in the reply filed on 2/23/06.

2. Applicant's election with traverse of Group I in the reply filed on 2/23/06 is acknowledged. The traversal is on the ground(s) that it is in fact not possible to make the product by a materially different process. This is not found persuasive because the examiner notes that the product does not require molding, one of the steps of the process of claims 19-20. Specifically, the product can be made by another materially different process (such as cutting or bolting) that does not include molding.

The requirement is still deemed proper and is therefore made FINAL.

### *Drawings*

3. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: 22, 38, 50.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37

Art Unit: 3612

CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

4. The drawings are objected to because in Figure 3, reference number 48 does not have a lead line. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### *Specification*

5. The disclosure is objected to because of the following informalities: on page 4, [Para 16], line 4, “sift” should be “soft”. Appropriate correction is required.

Art Unit: 3612

6. The abstract of the disclosure is objected to because on line 8, “the clamp” should be “The clamp”. Correction is required. See MPEP § 608.01(b).

### *Claim Objections*

7. Claims 5 and 10 are objected to because of the following informalities:

In claim 5, on line 5, the second period should be deleted .

In claim 10, on line 3, “proving” should perhaps be “providing”.

Appropriate correction is required.

### *Claim Rejections - 35 USC § 112*

8. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

9. Claims 12 and 17-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 12 recites the limitation "clamp element" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim 17 recites the limitation "said plurality of field effect sensors" in line 6. There is insufficient antecedent basis for this limitation in the claim.

Claim 18 recites the limitation "soft durometer backer" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Art Unit: 3612

*Allowable Subject Matter*

10. Claims 1-11, 13-16 are allowed.
11. Claims 12, 17-18 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

*Conclusion*

12. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
